

Retractable Fabric Awnings

“Our Name Reflects Our Quality”

Awning Systems

Sunrise

Our most popular unit, this lateral arm awning is available in projections up to 13'1", with no width restrictions. Its steel square bar, roller tube, and triple cable and spring loaded arms offer the strength needed for longevity. The tilting arms close completely and offer outstanding fabric protection while simultaneously activating the automatic wind-lock. The system carries a 10-year warranty and can be sold with a hood in two frame colors. Mounting options include wall, soffit, or roof.

Little-Big

Where conventional awnings stop, the Little-Big starts. This awning has all the features of the Sunrise, but with crossing arms allowing units to be made with less width than projection. It is now possible to install a full size awning even in the most limited spaces. The system carries a 10-year warranty and can be sold with a hood in two frame colors. Mounting options include wall, soffit or roof.

Toga

Providing ultimate fabric protection, this cassette awning system, has the roller tube encased in a clamshell of aluminum providing ultimate fabric protection. It carries all the features of the Sunrise and is available in widths up to 23'. The system also carries a 10-year warranty and is best used for roof mounting applications. It is available in two frame colors.

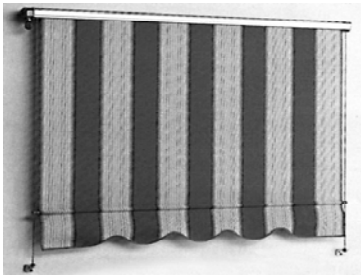

Retractable Fabric Awnings

“Our Name Reflects Our Quality”

Toga-Little Big

This awning is a combination of the cassette awning and the crossing arm system, available in widths from 4' to 14'. The system also carries a 10-year warranty and is best used for roof mounting applications. It is available in two frame colors.

Retractable Valance

Vario-volant is a vertical extension of the awning's fabric cover at the front of the awning. It allows the fabric to be lowered down from the front bar using a simple gear mechanism. This makes it possible to curtail horizontal sun and provide privacy. Vario-volants may be used on any awning up to 19' in width. On larger projections, the projection must be 10' or less. Drops are available in 3' and 6' mesh and acrylic fabric.

Vario-vertical Drop

A vario-volant is a self-storing vertical drop of fabric on a roller tube. It can be raised or lowered using a gear mechanism. The gear rotates the roller tube, moving the fabric vertically along the side cable guides. Vario-Volant drops are available in width 3' to 23' with drops of 3' and 6' in mesh or acrylic.

Retractable Fabric Awnings

Sunselect

For the price sensitive customer, this lateral arm awning is available in projections of 10'2 and 11'6", with varying widths up to 20'. It maintains a steel square bar, steel roller, and double and triple cable spring-loaded arms with an upgraded arm bracket. The system carries a 5-year warranty and can be sold with a hood. It is available in white, with Recacril fabric only.

Mounting options include wall, soffit, or roof. Awnings are available with a 4' mesh drop from the front bar. If motorized, this awning will include a 535RTS with 18' plug-in-cord and a 1 channel indoor remote.

Sunpitch

Also for the price sensitive customer, this lateral arm awning is available in projections of 10'2 and 11'6", with varying widths up to 20'. It maintains a steel square bar, steel roller, double and triple cable spring-loaded arms, and most importantly an adjustable pitch bracket. The system carries a 5-year warranty and can be sold with a hood. It is available in white, with Recacril fabric only. Mounting options include wall, soffit, or roof. Awnings are available with a 4' mesh drop from the front bar. If motorized, this awning will include a 535RTS with 18' plug-in-cord and a 1 channel indoor remote.
